AD MACHINERY TO SILVIS SHOP

Latest Models at Equipment Are Being Installed at the Plant of Rock Island.

A five-horse power-belted tire turning lathe, which will turn locomotive tires of modern giant engines, has been added to the equipment of the Rock Island lines at the shops in Silvis. The lathe costs approximately \$10,000. The new machine is replacing one of a smaller type.

The Rock Island is spending lots of money in placing new machinery into its shops. At the present time there are electric furnaces for treating of steel, high-speed and low-carbon being installed. Setting up of an electric riveting heater, capable of heating five-eighths inch rivets in twelve seconds was recently completed.

Recently 10 of the Mountain type passenger locomotives were received at the Silvis shops.

\$1.50 WHEAT ON STOCK MARKET IN RUSH TO SELL

Chicago, Nov. 26.—In a general rush to sell, wheat tumbled today to below 1.50 a bushel, the first time since the World war. The immediate bearish factors were the strained banking situation in North Dakota, a break in the cotton market and a new downturn in foreign exchange. British buying of wheat took place on the downward swing of prices, but rallies failed to last, and the market fell as low as 1.47 a bushel for March delivery. Opening quotations, which varied from 3 1/2c to 8c lower, with December 1.53 1/2c to 1.56 1/2c and March 1.47 to 1.51 were followed by only moderate and brief recoveries from initial bottom figures.

Comparative firmness was shown later as a result of estimates that 1,900,000 bushels of domestic-grown wheat had been bought for export by way of Gulf of Mexico, making 4,000,000 bushels so far this week. The close was unsettled, 6c to 7 1/2c net lower, with December 1.52 1/2c and March 1.48 to 1.48 1/2c.

Corn weakened with wheat. After opening 5 1/2c to 1 1/2c lower, including May at 70 1/2c to 70 3/4c, the market reacted a little, but then sagged again.

December corn touched the lowest point yet since before the war, but the market subsequently showed stubborn resistance to selling pressure. The close was nervous, with May 71 1/2c to 71 3/4c.

Oats were depressed by the action of other cereals, starting 1/2c to 3/4c down, May 47 1/2c to 48 1/2c and continuing weak.

An advance in hog values counterbalanced to some extent in the provision market the bearish effect of grain decline.

TO LEAVE VIA.

B. L. Christy, one of Viola's most energetic and wide-awake business men, is figuring on leaving Viola in the spring and moving to Galesburg. Arrangements to that end have already been completed.

Mr. Christy has already purchased a home in Galesburg and while he does not expect to move until spring, he will spend at least a couple of days each week in that city.

Mr. Christy says that he has not outgrown Viola, but as he has a family of children growing up he figures that the educational advantages in the larger places such as Galesburg are worth considering.
